

## SecureWineShop Store Management

VinterActive's team of wine marketing professionals didn't merely create an ecommerce system for others to use. We rely on SecureWineShop™ every day to sell wine for our own clients. Our experience and desire to make the software as productive as possible has led us to develop a set of store management features that are second to none.

Daily tasks like order processing, product updates and customer management are simplified in SecureWineShop™ with exclusive features like our Order Detail Report, Product Update, and Customer Profile screens.

Management insight is enhanced with an exclusive Management Dashboard that automatically updates and displays summaries of new orders, sales totals, top-selling products, and top-spending customers every time you log on.

Other powerful store management features built-in to SecureWineShop™ include:

-

Quick order lookup by ID, date range or order status

-

Choice of manual or automated credit card processing

-

Order Status field with automated email confirmations

-

Invoice/packing slip creation

-

Multiple shipping methods & zones

-

State or zip-based sales tax

-

Optional integration with UPS/USPS/FedEx
